

HOME

Directed by Yann Arthus-Bertrand

2009

We are living in exceptional times. We have 10 years to change the way we live, avert the depletion of natural resources and the catastrophic evolution of the Earth's climate. The movie Home is an amazingly beautiful tribute to our planet.

Next June 5th will be World Environment Day. The environment. Our planet. Of all the issues we can chose to address or ignore, to embrace or discard, to concern ourselves with or to make fun of, none are more critical. Make no mistake about it, our very survival as a species depends on them.

Well, found over at Orcas in the Mist (thanks for the scoop, Elo), here's the upcoming eye-opener: a movie called Home, directed by Yann Arthus-Bertrand and produced by no other than the mighty Luc Besson.
